Experts Outlook on OMICS International conferences

It has been an eye-opener about what diabetic medication is, and the ability to move from one track to another was the key!

Very glad that I was able to speak at such a wonderful conference and appreciate the opportunity.

Mel Torrie, CEO, Autonomous Solutions, USA

It was my pleasure to participate in the 3rd international Conference on Pediatrics in San Antonio earlier this month. I had the opportunity to meet numerous pediatric colleagues from both the United States and Internationally. My keynote lecture was well received and I found the OMICS staff to be very cordial. The meeting ran very smoothly from beginning to end and the facilities were wonderful.

Howard S Weber, Director of Interventional Pediatric Cardiology, Penn State Hershey Children’s Hospital, USA

First off, I cannot thank you enough for reaching out to me to submit abstracts for the conference. It was so well put-together, authentic, and intellectually stimulating. And, for those accolades, your efforts, your passion for making such a conglomeration of people come to fruition was truly inspiring. And, on that same note, thank you for the opportunity to give a second speech! I was able to not only share my own qualitative research methods, but was also able to showcase data into a “storyline” method that was well received by our peers. For that second speech, I did prepare an abstract for it’s publication in whatever formats it will be syndicated to; I’ll attach it in the email. Let me know if there’s anything else you may need. Again, I can’t express my gratitude toward you for both seeking out my abstracts and putting together this phenomenal conference. Greatly looking forward to speaking at next year’s event.

Matt Chanock, Conservationist, USA

The best part of the meeting was its close-knit atmosphere, almost like a family. As a result people from the audience felt free to ask questions without inhibition. The meeting was well organized from a practical and administrative aspect but the combination of a small meeting with few attendees and diverse aspects of metabolomics did make the conference a bit thin in returning scientific value to my investment in time and money to the meeting. My proposal would be to select fewer main topics.
